Jean Mazedjian
Pension Fund Manager's Chief Executive Officer

AMUNDI-ACBA ASSET MANAGEMENT CJSC Fixed income pension fund

Notes to interim condensed financial statements for the three-month period ended March 31, 2026

1 - Accounting rules and methods

The quarterly financial statements are prepared in accordance with French Generally Accepted Accounting Principles (French GAAP). Quarterly accounts are presented in the format provided by ANC Regulation No. 2020-07 as amended by ANC Regulation 2022-03.

The following General accounting principles apply, viz.:

- True and fair view;
- Regularity and fairness;
- Prudence;
- Consistency of accounting methods from one year to the next.

Revenues from fixed-yield securities are recognized on accrual basis. Acquisitions and disposals of securities are recognized at cost, excluding transaction costs.

The accounting currency of the portfolio is the ARMENIAN DRAM (AMD). Percentage holding and positions in the financial statements are presented as percentage to net assets as at reporting date (%). The financial year has a duration of 12 months. The accounting period reported on is the three-month ended March 31, 2026.

The Manager of the Fund is AMUNDI-ACBA ASSET MANAGEMENT CJSC. The Fund administration is carried out by CACEIS Fund Administration. The custodian and the registrar of participants is the Central Depository of Armenia OJSC.

The Fund is a pension fund managed by independent professional asset managers until the proceeds are paid out to participants in the form of pension benefits once participants reach retirement age. The Fund participants are the owners of the pension funds' assets.

The Fund invests in high-quality Armenian and foreign securities, with foreign currency investments being limited to 40% of Fund's assets. The objective of the Fund is to maximize the total return on assets, by investing 100% of its assets in fixed income instruments, such as bonds, bonds funds, money market instruments, deposits and other assets. According to the investments guidelines as set by the Law no investment is allowed in equities, equity funds or any other equity-equivalent instruments. Target group is pension savers with low risk tolerance.

Asset valuation rules. Financial instruments are initially recognized at historic cost and carried on the Balance Sheet at their current value: this is their latest known market value or, in the absence of a market, is determined by any external means or by recourse to financial models.

Differences between the securities' current values determined as above and their original historic cost are recognized in the accounts as "differences on estimation". Transactions with securities are recorded at trade date.

Securities denominated in a currency other than that of the portfolio are valued in accordance with the above principle and then converted into the currency of the portfolio at the exchange rate obtained on the valuation date.

Deposits and financial accounts. Deposits are valued according to the linear method. Cash and cash equivalents comprise cash at banks.

Equities, bonds and other securities traded in a regulated market or equivalent. The equities and other securities traded in a regulated market or equivalent are valued based on the day's closing market price.

Bonds and similar securities are valued at the closing price notified by various financial service providers. In the absence of a transaction on the closing day, securities are valued at the average bid and ask prices notified by the financial service provider. Interest accrued on bonds and similar securities is calculated up to the date of asset valuation.

Equities, bonds and other securities not traded in a regulated market or equivalent. Securities not traded in a regulated market are valued by the Fund Manager using methods based on net equity and yield, taking into account the prices retained in significant recent transactions.

AMUNDI-ACBA ASSET MANAGEMENT CJSC Fixed income pension fund

Negotiable credit instruments (Notes). Negotiable credit instruments, which are not actively traded in significant amounts, are actuarially valued on the basis of a reference rate as specified below, plus any enhancement to represent the issuer's intrinsic characteristics:

- Notes maturing in one year's time or less: euro interbank offered rate (Euribor);
- Notes maturing in more than one year's time: the prevailing rate on medium-term interest-bearing Treasury notes or, for the longest Notes (BTAN), on near-term fungible Treasury bonds (OAT); Negotiable credit instruments maturing in three months or sooner may be valued according to the linear method.

Armenian Treasury notes are valued using the market rate published daily by the Central Bank of Armenia.

UCITS held. UCITS (undertakings for the collective investment of transferable securities) units or shares are valued at the latest known NAV.

Temporary transactions in securities. Securities held under sell-back deals are carried in Assets under "credits for securities held under sell-back deals" at the amount provided for in the contract, plus accrued interest receivable.

Securities sold under buy-back deals are booked to the buying portfolio at their current value. The corresponding debt is booked to the selling portfolio at the value set in the contract plus accrued interest payable.

Loaned securities are valued at their current value and carried in Assets under "credits for loaned securities" at their current value plus accrued interest receivable.

Borrowed securities are carried in Assets under "borrowed securities" at the amount provided for in the contract, and in Liabilities under "debts for borrowed securities" at the amount provided for in the contract plus accrued interest payable.

Derivative instruments

Derivatives traded in a regulated market or equivalent:

Derivative instruments traded in regulated markets are valued at the day's settlement price.

Derivatives not traded in a regulated market or equivalent:

Swaps. Rate swaps and/or forward currency transactions are valued at their market value according to the price calculated by discounting future interest streams at market interest (and/or exchange) rates. This price is adjusted for default risk.

Index swaps are valued actuarially on the basis of a reference rate provided by the counterparty.

Other swaps are valued at their market value or are estimated as specified by the Fund Manager.

Swap commitments are stated at their nominal value or at an equivalent amount, where there is no nominal value.

Management fees. Management fees are calculated at 0.85% per annum, including any applicable taxes, on the net asset value of the Fund on a daily basis. These fees are imputed to the fund's Income Statement. Management fees are paid in full to the Fund Manager, which bears all the fund's operating costs, except for audit fees and guarantee fund payments. The management fees do not include dealing costs. In the financial statements audit and guarantee fund fees are presented as part of management fees.

Allocation of net profit. The net profit (loss) for the period is the total of interest, arrears, premiums, allotments and dividends, plus income on ready cash, minus management fees and financial dealing costs. Before 2024 changes in French GAAP neither realized capital gains or losses nor subscription/redemption fees were counted as revenue. After 2024 changes in French GAAP realized capital gains or losses are counted as revenue.

The amounts available for distribution are the net profit for the period, plus any sums retained earnings, plus or minus the balance of any revenue adjustment accounts relating to the financial period in question.

Equalization of units issued during the period

Revenue adjustment. All holders should receive the same per unit distributable income, whatever the date of their subscription. A corrective mechanism, recorded in the account "Revenue adjustment" neutralizes the effect of subscriptions and redemptions on income per unit. At each calculation of net asset value, the Fund

AMUNDI-ACBA ASSET MANAGEMENT CJSC Fixed income pension fund

determines distributable income. The unit performance is not affected by the subscriptions and redemptions. The revenue adjustment mechanism ensures neutrality of subscriptions and redemptions on the distributable income per unit.

Gains and losses. The net realized gains (deducted from management fees and realized losses) from the financial year will increase the same type of net realized gains from earlier financial years, if the fund hasn't distributed or accumulated its gains and will also increase or reduce the equalization accounts for realized gains.

All income generated by the Fund's assets, including, but not limited to: realized general capital gains, fixed income securities' interest payments. etc., shall be reinvested in the Fund. No distributions are expected.

Subscription and redemptions of units. Issuance and redemption of fund units is carried out based on the last available net assets value per unit as of the date of issuance and redemption. No charges or fees are made for issuance of units. Redemption fees are born by the applicant and vary from 0% to up to 3% depending on the type of the redemption transaction and are stipulated by the Fund Rules and applicable legislation of the Republic of Armenia.
